

## Cover-Fresh®

Cover-Fresh® is a net film developed by NNZ for automatically covering trays, protecting the packed product. The cover layer is made from CLAF®, an exceptionally strong non-woven net product that is almost impossible to tear by hand. The cover layer has strong polyethylene strips

on two sides which are glued to the tray. The strips can be printed in up to 8 colours. CLAF® can be supplied in a range of 12 colours. Cover-Fresh® is supplied on rolls and is very easy to work with by machine.

## Cover-Fresh®
