

## Jute

NNZ has supplied jute bags ever since the business was founded in 1922. Jute is one of the oldest traditional packaging materials, and it is still frequently used today due to its excellent qualities. This purely natural material is made from the bark of the jute plant. It is strong and

durable and has ventilating and absorbent properties. The structure of the fabric prevents damage to the packaged product.

Jute bags are used as transport packaging for products including potatoes, mussels, pulses, grain and sugar.

## Jute

- Material** 100% jute.
- Quality** In various weights and qualities, either standard colour or full bright.
- Printing** Maximum of three colours.
- Accessories** Sewing thread for hand sewing machines and packaging.

NNZ is a leading organisation in the world of innovative packaging for the agricultural sector. The company undertakes intensive market and product research and continually anticipates market developments. In doing so, NNZ has earned a central position at international level within the world of packaging.
