

## Power-Lift®

The Power-Lift® is a flexible intermediate bulk container developed by NNZ which is specially suitable for transporting and storing potatoes, onions and carrots. The Power-Lift® is made from very heavy quality, exceptionally strong polypropylene fabric which retains its shape and combines enormous tensile strength with a soft surface structure. Ventilation strips ensure that the climate inside the bag is optimal.

The Power-Lift® is suitable for weights from 1,000 kg to 1,250 kg, with a safety factor of 5:1 for single trip use, which means that the container can actually bear 5 times its filled weight. The Power-Lift® has been tested by independent test institutes in accordance with NEN-EN 1898 and/or EFIBCA standards and complies with the strongest international quality requirements.

## Power-Lift®

### Material

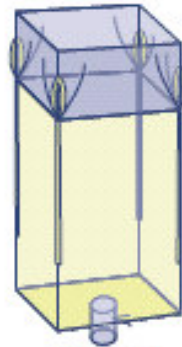

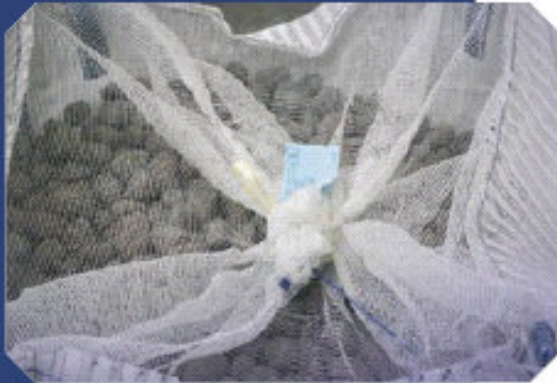

Woven polypropylene fabric.

### Quality

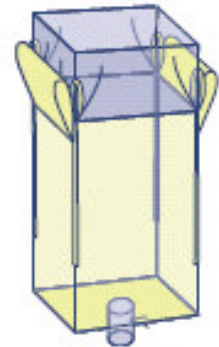

Various fabric weights, UV stabilized 150 KLY, with ventilation strips.  
SWL 1,250 kg. (safe working load)  
SF 5:1 single trip, SF 6:1 multi trip (safety factor).

### Printing

On one to four sides,  
up to 3 colours.

standard

standard  
with sleeves

### Type

Standard internal dimensions  
90 x 90 x 190 cm, other sizes on  
request.  
With lifting loops or with lifting loops  
and sleeves, fitted with open woven  
closure skirt and discharge spout  
40 x 70 cm. With or without  
document pocket.

NNZ is a leading organisation in the world of innovative packaging for the agricultural sector. The company undertakes intensive market and product research and continually anticipates market developments. In doing so, NNZ has earned a central position at international level within the world of packaging.
