

Woven net bags

Polypropylene woven net bags are the ideal solution for applications which require a strong, net bag which will retain its shape. Among other things they are used for the packing of export potatoes, vegetables and fruit, as well as for packing wood logs, plastic and metal parts.

They are also used as outer packaging. NNZ supplies woven net bags in a range of standard sizes, different qualities and colours, to suit the product to be packed. They can be made to order, with or without a printed plastic label or sewn-on polytag, or can also be over printed.

Woven net bags

Material Polypropylene woven cloth (leno).

Quality Different mesh sizes and fabric weights.

Colours Many different colours.

Type Can be supplied in all usual sizes, with or without a drawstring. For packing weights from 5 kg to 50 kg. Position printed label 8-20 cm wide. Gold and silver coloured printing is also possible, as well as over printing in 1 or 2 colours on one side.

NNZ is a leading organisation in the world of innovative packaging for the agricultural sector. The company undertakes intensive market and product research and continually anticipates market developments. In doing so, NNZ has earned a central position at international level within the world of packaging.
