

StretchNet® Pallet Wrap

In the warehouse or on the loading dock, you need to protect and organize your merchandise for storage or shipping. With NNZ Pallet Wrap, even the toughest, most unstable or irregular load is contained safely and securely for

easy handling and efficient inventory. StretchNet® complements irregular loads and loads that need total coverage. Designed with built-in memory, StretchNet® will fit loads perfectly without continued stretching or breakage after application.

the packaging network

StretchNet® Pallet Wrap

Tie off loads with convenient clips provided with every roll.

Highlights

- Able to realize up to 20% stretch during application.
- Provides elasticity during the wrapping process, conforming to the shape of the pallet load, allowing irregular or odd shapes to be wrapped effectively.
- Once StretchNet® is applied, shifting of contents is minimized as the net maintains its form and won't stretch out further.
- Punctures and tears do not propagate.
- Netting won't "neck down" or become narrower when applied with tension, allowing for fewer wraps per pallet than competitive breathable pallet wraps.
- Prevents pallet contents from shifting in the vertical direction, a common problem with competitive breathable pallet wraps that lack strength in the cross direction of the net.
- Provides ventilation of the pallet contents, preventing heat, condensation or fumes from collecting such as with conventional stretch film wraps.
- Specialized equipment is not necessary, reducing cost and the potential for operator error.

Specs

Material – LLDPE

Core size – 3"

20"x5500' – 32 rolls/pallet, 14.85lbs/roll

30"x5500' – 16 rolls/pallet, 22.3lbs/roll

20"x10,000' – 18 rolls/pallet, 27.3lbs/roll

30"x10,000' – 9 rolls/pallet, 40.5lbs/roll

NNZ is a leading organization in the world of innovative packaging for the agricultural and the industrial sector. The company undertakes intensive market and product research and continually anticipates market developments. In doing so, NNZ has earned a central position at international level within the world of packaging.
